

## NAIL TECHNOLOGY (CERTIFICATE - 250 CLOCK HOURS)

Objective: The study of nail technology encompasses natural nails and artificial enhancements. Students will receive sufficient and current information and training in the below areas that will enable him/her to systematically and professionally perform the required skills of the Arts and Science of Nails. All programs are taught in the English. Textbooks and program material are only offered in the English language.

Successful completion of the 250-clock hour Nail Tech Program prepares the graduate to take the state board examination necessary to obtain a Nail Tech license for an entry-level position as a manicurist, or nail tech. *Criminal convictions may affect a student's ability to be licensed, certified, or registered.*
